Education

Faculty of Engineering and Technology, University of Lucknow
B.Tech in Computer Science and Engineering

Dec 2020 – Jun 2024
CGPA: 7.5/10

Skills

Languages & Technologies: JavaScript, Java Node.js, Express.js, REST API, WebSockets, MongoDB, SQL, OOPS, Cloudinary Integration, React.js, Next.js, TypeScript, HTML5, CSS3

Tools: Git, Github, Postman, Appwrite, Visual Studio Code

Work Experience

Code Connect , Remote

April 2025 - July 2025

Web Developer Intern

- Worked on a CRM project built with React.js as part of my internship.
- Learned to debug efficiently, implement responsive designs, and integrate third-party libraries for enhanced functionality. Gained hands-on experience collaborating on real-world project.

Project Work

Hospital Management System – Backend Project

GitHub

Tech Stack - Node.js, Express.js, MongoDB, JWT, Cloudinary, Multer, Postman

- Built the backend using Node.js, Express.js, and MongoDB, developing a RESTful API for managing patients, doctors, lab reports, and billing efficient data flow.
- Implemented data modeling, secure JWT authentication, role-based access control (RBAC), and file uploads using Multer + Cloudinary, ensuring reliable and secure backend system.
- Designed and tested complete RESTful APIs using Postman, applying custom API responses, centralized error handling, and backend best practices, successfully deployed on Render.

Videotube – Backend Project

GitHub

Tech Stack - Node.js, Express.js, MongoDB, JWT, Cloudinary, Multer, Postman

- Built and deployed the backend for a video-sharing platform using Node.js, Express.js, and MongoDB, implementing JWT-based authentication, bcrypt encryption. Designed and tested RESTful APIs using Postman, achieving a 100% pass rate in functional testing.

ShopNest (E-Commerce Website)

Live | GitHub

Tech Stack - React.js (Vite), Tailwind CSS, Redux-Tool-Kit, Firebase, API Integration

- Developed an end-to-end e-commerce platform using React and Redux Toolkit for state management, with Firebase for user authentication.
- Set up real-time product data fetching from an external API, enhanced user experience by adding dynamic toast notifications for cart and liked item actions, improving user engagement. Deployed the website on Firebase Hosting.

Blog-AI – Full Stack Project

GitHub

Tech Stack - Node.js, Express.js, React.js, MongoDB, Gemini AI, Tailwind CSS

- Built a full-stack AI-powered blogging platform using React.js, Node.js, and Express.js, implementing complete CRUD operations through RESTful APIs.
- Integrated the Gemini API to automatically generate concise blog summaries, enhancing content creation and readability.
- Utilized MongoDB for scalable data management and designed a fully responsive UI with Tailwind CSS and React Router DOM for smooth navigation.

Relevant Coursework

- Data Structures and Algorithms, Database Management Systems, Operating Systems, Object-Oriented Programming, Software Engineering, Computer Networks
