EDUCATION

B.Tech in Computer Science and Engineering | CGPA: 7.5 / 10
Faculty of Engineering and Technology, University of Lucknow

Dec. 2020 – 2024
Lucknow, Uttar Pradesh

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3, SQL, OOPS, Java

Frameworks / Technologies: React.js, Next.js, TypeScript, Redux, Node.js, Express.js, RESTful APIs, API Integration, Tailwind CSS

Databases: MongoDB, MySQL

Tools: Git, GitHub, Appwrite, Postman, Visual Studio Code, IntelliJ IDEA

WORK EXPERIENCE

Code Connect

Web Developer Intern

April 2024 – June 2024

Remote

- Gained experience in building full-stack applications using React.js, Node.js, and MongoDB with secure authentication.
- Learned to debug efficiently, implement responsive designs, and integrate third-party libraries for enhanced functionality.

PROJECTS

ShopNest (E-Commerce Website)

Tech Stack - React.js, Redux Toolkit, Firebase, API Integration

Live | GitHub

- Developed an end-to-end e-commerce platform using **React.js** and **Redux Toolkit** for state management, with Firebase for user authentication.
- Set up real-time product data fetching from an external API, achieving 99.9% uptime and keeping product listings updated.
- Enhanced user experience by adding toast notifications for cart and liked item actions, improving user engagement by 30%. Deployed the website on **Firebase Hosting**.

Blog-AI – Full Stack Project

Tech Stack - Node.js, Express.js, React.js, MongoDB, Gemini AI, Tailwind CSS

GitHub

- Built a full-stack AI-powered blogging application using **React.js**, **Node.js**, and **Express.js**, implementing end-to-end **CRUD** functionality via RESTful APIs.
- Integrated the **Gemini API** to auto-generate blog summaries with 90% accuracy, improving user content creation speed and readability by 40%.
- Leveraged **MongoDB** for scalable blog data storage and retrieval; designed a fully responsive UI using **Tailwind CSS** and optimized navigation with **React Router DOM**, enhancing user retention by 25%.

SearchYourMovies – Movie Search Web App

Tech Stack - React.js (Vite), Tailwind CSS, TMDB API, Appwrite, Netlify

Live | GitHub

- Built a responsive movie discovery platform using **Vite + React.js** and styled with **Tailwind CSS**, and integrated **TMDB API** for real-time movie data.
- Implemented a dynamic ranking system to showcase top-rated movies at the top, with live updates using **Appwrite** backend, improving movie visibility and user relevance by 35%.
- Built a custom **debouncing hook** for the search functionality, reducing redundant API calls by 60% and improving app responsiveness; deployed the application on **Netlify** with 100% uptime during testing.

Videotube – Backend Project

Tech Stack - Node.js, Express.js, MongoDB, JWT, Cloudinary, Multer, Postman

GitHub

- Built a backend for a video-sharing platform using **Node.js**, **Express.js**, and **MongoDB**, allowing users to upload and store videos.
- Implemented JWT-based authentication and bcrypt for secure password management, safeguarding user credentials with a 100% pass rate during security testing.
- Designed and tested **RESTful APIs** using **Postman**, adhering to industry standards for API development and achieving a 100% pass rate in functional testing.
- Integrated Cloudinary and Multer for efficient video file handling, optimizing upload and retrieval processes, reducing storage retrieval time by 25%.

RELEVANT COURSEWORK

Data Structures and Algorithms, Database Management Systems, Operating Systems, Object-Oriented Programming, Software Engineering, Computer Networks
