EDUCATION

B.Tech in Computer Science and Engineering | CGPA : 7.5 / 10
Faculty of Engineering and Technology, Lucknow University

Dec. 2020 – 2024
Lucknow, Uttar Pradesh

TECHNICAL SKILLS

Languages: Java , JavaScript (ES6+), HTML5, SQL, OOPS

Frameworks/Technologies: Node.js , Express.js , React.js , Next.js , Redux , RESTful APIs , Linux , CSS3 , Firebase , Tailwind CSS

Databases: MongoDB, MySQL , Firebase Firestore

Tools: Git, GitHub , IntelliJ IDEA , Visual Studio Code , Postman

WORK EXPERIENCE

Code Connect

Full Stack Developer

July 2024 – Present

Remote

- Designed and developed a responsive landing page for CRM projects, ensuring seamless user experience and cross-browser compatibility.
- Fixed front-end issues and optimized UI components for improved performance in lead management modules.
- Integrated geolocation APIs to enhance functionality and enable location-based features within the CRM system.
- Identified and resolved bugs in API endpoints, improving overall system performance and reliability.

Code Connect

Web Developer Intern

April 2024 – June 2024

Remote

- Gained experience in building full-stack applications using React, Node.js, and MongoDB with secure authentication.
- Learned to debug efficiently, implement responsive designs, and integrate third-party libraries for enhanced functionality.

PROJECTS

Videotube– Backend Project

Node.js, Express, MongoDB, JWT, Cloudinary, Multer, Postman

GitHub

- Built a backend for a video-sharing platform using **Node.js**, **Express**, and **MongoDB**, allowing users to upload, store videos.
- Implemented JWT-based authentication and bcrypt for secure password management, safeguarding user credentials with a 100% pass rate during security testing.
- Designed and tested **RESTful APIs** using **Postman**, adhering to industry standards for API development and achieving a 100% pass rate in functional testing.
- Integrated Cloudinary and Multer for efficient video file handling, optimizing upload and retrieval processes, reducing storage retrieval time by 25%.
- Designed backend logic with reusable **controllers** and **middleware**, improving code scalability and maintainability by 30%. Applied best practices in error handling, improving debugging efficiency by 20%.

Blog-AI – Full Stack Project

Node.js, ExpressJs, ReactJs, MongoDB, AI Integration , Tailwind CSS

GitHub

- Developed Blog AI application using React for the frontend and Node.js with Express.js for the backend, supporting CRUD operations through RESTful APIs.
- Integrated **Gemini API** to deliver AI-powered blog content summaries, enhancing user productivity and content optimization.
- Utilized MongoDB database for scalable and efficient data storage, ensuring seamless handling of blog entries.
- Designed a responsive UI with Tailwind CSS and implemented routing functionality using React Router DOM.

ShopNest (E-Commerce Website)

React, Redux, Firebase, API Integration

Live Project | GitHub

- Developed an end-to-end e-commerce platform using **React** and **Redux** Toolkit for state management, with Firebase for user authentication.
- Set up real-time product data fetching from an external API, achieving 99.9% uptime and keeping product listings updated.
- Enhanced user experience by adding dynamic toast notifications for cart and liked item actions, improving user engagement by 30%. Deployed the website on **Firebase Hosting**.
